# Arnold Restrepo Hernandez

## Frontend Developer

**Bogotá, Colombia**

**Phone:** +57 323 209 7183

**Email:** [contact@arnoldrestrepo.com](mailto:contact@arnoldrestrepo.com)

**Portfolio:** [arnoldrestrepo.dev](http://arnoldrestrepo.dev)

### PROFESSIONAL SUMMARY

Frontend Developer with 6 years of experience in web development, specializing in planning and implementing scalable applications. I have a proven track record of creating user-friendly interfaces across industries such as logistics, marketing, and fintech, utilizing technologies like React.js, Next.js, and React Native. I excel in developing custom component libraries and user authentication systems, demonstrating strong collaboration and communication skills. I am passionate about continuous learning and innovation, focusing on improving development processes and enhancing digital product quality within organizations.

### EXPERIENCE

#### Frontend Software Engineer II

ADDI, Colombia March | 2021 - September 2024

#### Responsibilities:

- Leads the development of fraud prevention features using custom photo capture software. Integrates with Auth0 and Facetech to improve identity verification accuracy. Achieves a 70% reduction in fraudulent activities, enhancing platform security and user trust.
- Contributes to the architecture and development of the ADDI mobile app by building smart components and implementing a BFF (Backend for Frontend) layer using React Native. Streamlines data flow and enhances app scalability. Improves performance and reduces development time by 20%.
- Creates and maintains a component library hosted in Storybook for both web and mobile applications. Ensures consistency and reusability across platforms, improving collaboration among teams. Speeds up feature development by 25% through standardized components.

---

## Frontend Developer - UI Designer

Quick, Colombia | May 2019 - March 2021

### Responsibilities:

- Contributes to the redesign of the service flow for logistics requests by implementing user authentication through JWT and centralized login. Enhances security and streamlines the login process. Improves user experience and increases system efficiency by 40%.
- Develops interfaces and features using React JS, Redux, Redux Saga, and vanilla JavaScript. Enhances application performance and ensures a seamless user experience. Delivers efficient and scalable solutions for complex frontend requirements.

## Frontend Developer - WordPress Developer

ONDigital S.A.S, Colombia | Nov 2016 - May 2019

### Responsibilities:

- Develops over 10 major websites using WordPress and HTML5, delivering projects for clients like Mapfre Colombia and Servientrega International. Ensures high-quality, responsive designs tailored to client needs. Boosts client satisfaction and engagement through custom-built solutions.

## UI Designer

Semillero de Investigación, SICLOG, Colombia | May 2016 - Nov 2016

### Responsibilities:

- Leads the planning, design, and development of the research group's website. Creates a responsive and user-friendly platform using modern web technologies. Enhances the group's online presence, increasing visibility and engagement.
